

IS THE PRICE OF GASOLINE LEAVING YOUR POCKETS EMPTY???????

LET US HELP KEEP MORE OF YOUR MONEY IN YOUR POCKET!!!!

You can't control the price of gas, but you can control how much gas you burn.

Performing simple and inexpensive vehicle maintenance does not only save gas money, **perhaps as much as \$1,200 per year**, but it also improves a vehicle's safety and dependability."

- When tires aren't inflated properly, it's like driving with the parking brake on, and can **save 12 cents per gallon**, according to the U.S. Department of Energy and the U.S. Environmental Protection Agency .

- An air filter that is clogged with dirt, dust and bugs chokes off the air and creates a "rich" mixture – too much gas being burned for the amount of air, which wastes gas and causes the engine to lose power. Replacing a clogged air filter can improve gas mileage by as much as 10 percent, **saving about 15 cents on a gallon.**

- A vehicle can have either four, six or eight spark plugs, which fire as many as three million times each 1,000 miles, resulting in a lot of heat, electrical and chemical erosion. A dirty spark plug causes misfiring, which wastes fuel. **Spark plugs need to be replaced regularly.**

- Keep your car properly tuned. A 21st Century tune-up can improve your gas mileage by an average of 4 percent. Fixing a serious maintenance problem, such as a faulty oxygen sensor, can improve your mileage by as **much as 40 percent.**
